

Twisted Rope

TWISTED POLYPROPYLENE

More than twice the strength of manila rope, polypropylene is made from 100% monofilament fibers. A floating rope which may be stored wet without damage to the fibers and has great resistance to rot, mildew, acids, oil, grease and most chemicals.

Diameters up to 4" and lengths to 25,000 feet available upon special request.

TWISTED NYLON

Great elasticity to absorb shock loads that would break ropes of the same size made of other fibers. Manufactured from 100% filament nylon fibers; the strongest rope in general use today. Approximately two and one half times the strength of Manila with excellent resistance to abrasion, rot, mildew, oil, grease, gasoline, acids and most chemicals.

Twisted Rope

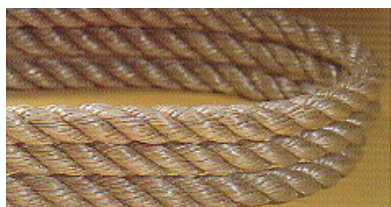

POLYESTER TWISTED ROPE

Manufactured from 100% virgin filament polyester fibers. Polyester has twice the break strength of manila and excellent resistance to abrasion. Where nylon has great elasticity, Polyester has very little. The ideal rope in application where minimum stretch is required. Resistant to oil, grease, acids, most chemicals, will not rot or mildew. May be stored wet.

SIZE	CASE WT.	REEL SIZE
3/16" x 1000'	12.0	10" x 5"

Diameters up to 4" and lengths to 25,000 feet available upon special request.

MANILA POLY TWISTED

Manila poly is half the weight of natural manila, yet is stronger and cost less. Like other polypropylenes, it is resistant to rot, mildew, abrasion and is not damaged by oil, grease and most chemicals.

3/4" x 600'	64.0	Standard

EXTRA-LENE TWISTED

The best properties of two compatible fibers, polyester and polypropylene, create an exceptionally high strength, lightweight and competitively priced rope. The polypropylene provides a high strength, lightweight core, while the polyester cover yarns provide great resistance to abrasion, excellent rendering properties and a long service life. It won't rot or mildew and is not subject to deterioration by oil, grease and most chemicals. Look for the distinctive orange tracers.
